

Welcome to our most popular Class Series. Here's how it works ...

We'll hold a different class every week where you'll learn a technique then take your project home to work on it. When you come back the following week we'll go over your project and discuss any challenges you've experienced. Then we'll move on to that week's project.

During the course of the Series, you'll be a part of a private facebook group where you can post your project pictures, finished or not and we can give you a hand if you're experiencing problems. As well a perfect opportunity to post your finished project and celebrate your successes—a great time to get some instant feedback.

We'll post videos to the page to give you some quick technique tips to jog your memory as sometimes this can be a lot of information to take in.

The Series is a \$180 value we're offering for \$125

Due to the low cost, no supplies are provided so please bring your tools and supplies from home or you can purchase any throughout the Series at a 20% discount.

Wire Working Series 2018

Beginner series

Jan 23 Tues 6-8pm Week 1: Basic Wire Wrapping where we cover how to wrap a stone, create a bail and a wrapping design.

Jan 30 Tues 6-8pm Week 2: Wire Wrapped Tree of Life. Learn how to attach wire to a circle and position your wire to make your tree branches then add stone chips.

Feb 6 Tues 6-8pm Week 3: Wire Wrapped Rings. Make your own wire rings. Add stones, crystals and more.

Feb 13 Tues 6-8pm Week 4: Precision Wire Wrapping. Use square and half round wire to make a harness for your stone. Get creative with your design and incorporate swirls, extra beads while making a beautiful one of a kind piece.
